

Self-serviced lockers OX.basic

Our modular metal locker system enables the reception, storage and collection of parcel deliveries through an integrated remote controlled smart device. In only one installation, we offer a flexible installation of several cabinets in custom dimensions of various combinations. The practical layout of the modules and clever technical elements make operation easier for end users, operators and carriers.

Premium quality and affordability

Fully automated production ensures high quality execution. Materials used meet the standards for outdoor use.

Custom-made

Customizable design and dimensions as per client's specifications.

Quick processing and speedy delivery time

Production and assembly take place locally in the Czech Republic with a large production capacity (lead time of 4-5 weeks from order).

Wide range of services

Installation, monitoring, maintenance, software integration, other services.

Branding

Optional own color design, alternatively printing or own logo, branding and visual identity.

Czech company

Production and development take place in the Czech Republic.

Module dimensions: W 600 mm, D 635 mm, H 2280 mm

Door width: 300 or 600 mm

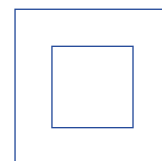

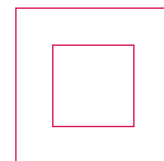

Door height: optional each by 125 mm

Legs: compensating for surface irregularities

Security: stabilizing elements, fixed to the wall or to the ground

Shelf load: 30 kg

Design conditions: indoor and outdoor

Self-serviced temperature controlled lockers OX.cool

Our modular metal box system enables the reception, storage and collection of your parcel deliveries through an integrated remotely controlled smart device in a temperature controlled, food safe environment. Our self-serviced cooling boxes are designed for short-term storage of food. Alongside our integrated cooling capacity, Ox.cool is equipped with an advanced air heating system, offering excellent low energy consumption. Our boxes are designed to cool between 0–6°C and heat between 16–22°C, regardless of the external environment temperature.

Hygienic conditions

Our self-cleaning box frequently disinfects itself using an integrated UVC light, ensuring the total destruction of viruses and bacteria. Shelves are made from stainless steel or galvanized sheet metal.

Low energy consumption

At full cooling capacity, our system matches (or frequently beats by up to 30%) comparable solutions, offering an industry standard 700W of consumption per module.

Noise level

Low noise level modules emitting only 50dB of sound.

Integrated condensation dispersal

No need to connect the box to the waste pipe, our lockers disperse any built-up condensation through the residual heat produced by our smart solution.

Emphasis on security

Upholding the latest modern manufacturing standards, our design minimized the risk of electronic contact with any liquid cooling, allowing a wide variety of temperature-controlled mediums to be utilized.

Contactless NFC technology

Our system allows access by smartphone, laptop or tablets through our integrated contactless NFC wireless communication technology.

Module dimensions: W 1200 mm, D 635 mm, H 2280 mm

Shelf dimensions: designed to fit 4 regular size shopping bag

Legs: compensating for surface irregularities

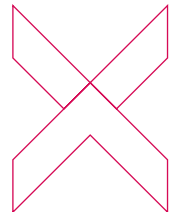

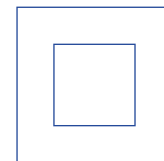

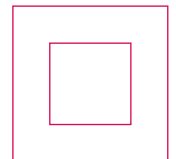

Security: stabilizing elements, fixed to the wall or to the ground

Shelf load: 30 kg

Refrigerant: ecological R290

Automatic defrosting: Yes

Design conditions: indoor and outdoor

Elegant series

- Internal box temperature display
- Internal lighting
- Heated frame
- In-built liquid spill protection
- Magnetic seal

Payment terminal OX.smart

OX.smart central control module is used to simplify and visualize parcel collection process through an integrated payment terminal. The entire module is composed of several elements which can be combined as per specifications. The module can be further extended by customer identification functionality alongside with installed LED lighting to ease customer navigation. UL certified safety standards based.

OX.cloud

OX.cloud application IoT layer providing connectivity of third parties to the OX.network. Own secured infrastructure with 24/7 management.

Module OX.point

Application at the collection point. Fully fledged customer clearance including the payment options by credit card or cash.

Module OX.logistics

A simple web interface for partners to book required capacity of our OX.network either one a one-time basis or for guaranteed longer period.

Module OX.monitor

Our monitoring center provides 24/7 monitoring and controlling of the entire OX.net network.

Module OX.mobile

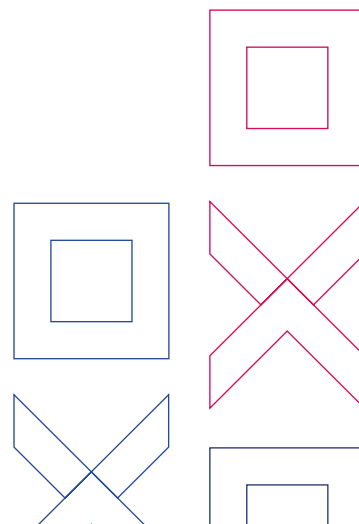

The mobile application on iOS and Android platforms enables convenient collection and dispatching of parcel deliveries

WE ARE **CONTEG**

the Czech manufacturing company founded in 1998. Today we are one of the leading manufacturers of comprehensive solutions in the field of data centers, refrigeration technology, telecommunications and engineering industry. We have a global business and technical background, our production plants are equipped with the latest technologies and our own testing laboratory. We supply products to small companies as well as large corporations and industrial companies.

IN CONNECTION WITH **PAYMENT4U**

a major technology company with more than 17 years of experience in the field of payment automation and payment software. We connect the world of software and hardware so that our customers enjoy a positive and enriching consumer experience from the use of our devices.

A photograph of a modern, multi-story building with a facade of light-colored stone panels and dark window frames. Several young trees are planted in front of the building, and a low stone wall runs along the sidewalk in the foreground. The scene is brightly lit, suggesting a sunny day.
